## **RBVND-LITE**

**Makes Your vending smarter, Smart IOT modem**

**RBVND-LITE** is a special modem adopted to work with vending machines. Based on reliable LTE Cat. M1/ 2G module it is an irreplaceable platform for telemetric applications in vending sector.

It is possible to connect the device to most popular IoT platforms on the market. Audits have full information about state of the machine, status of sold products, amount of money and errors that occurred during usage.

## RBVND-LITE

Modem is equipped with standard communication interfaces like Executive, MDB and master MDB it is compatible with most of machines available on market. Additionally, serial interface allows downloading audit EVA/DTS from vending machine controllers (VMC) or coin collectors.

**RBVND-LITE** is dedicated for: all IoT developers, platform developers, telemetry solutions providers who need remote access and centralized information about vending machines.

## KEY BENEFITS
